Education

B.Sc. (Hons) Computer Science SLIIT City UNI (University of Bedfordshire, UK)	Reading
Higher National Diploma in IT SLIIT City UNI (University of Bedfordshire, UK) (GPA - 3.4)	03/2024 - 11/2025
Foundation Certificate in IT SLIIT City UNI (University of Bedfordshire, UK) (GPA - 3.2)	03/2023 - 11/2023

Professional Experience

Web Developer (Part Time) Nierwell (Pvt) Ltd. (Startup)	05/2025 - Present Hybrid
• Development of an E-Commerce software using the MERN Stack. • Collaborated for database designing, coding and managing along with collaboration for the designing and planning phase of the software. • Lead the technical team towards the deadlines and arrange technical meetings	
Search Operations Intern & Executive PickMe Digital Mobility Solutions Lanka PLC	07/2025 - Present On-site
• Contributing to the improvement of search functionality at PickMe Food & Market by supporting tagging systems and assisting in refining algorithm rules on the technical side.	

Technical Skills

Languages: Typescript, Javascript, Python, Java, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, MySQL, Supabase, Vector DB

Machine Learning & Data Tools: scikit-learn, pandas, NumPy, spaCy, sentence-transformers, SciPy

ML Techniques: Text Classification, Semantic Search, Clustering, Summarization, Similarity Scoring, Basic Feature Engineering, Data Cleaning

Developer Tools: Git, GitHub, Trello, Postman, Vercel, Render

Other: REST APIs, basic Web Scraping, CSV/Excel data handling

Design Tools: Figma, Wireframing, Prototyping, Basic UI/UX Principles

Projects

SKU-MatchOps [↗](#)

10/2025

SKU Matching Engine

[Source Code](#) [↗](#)

Tech Stack: Python, sentence-transformers (NLP embeddings), GLiNER (NER), Semantic + Keyword Matching, Pandas (Data Processing), Streamlit

- An AI-powered engine built to intelligently match, clean, and tag product SKU data in batches using hybrid embedding retrieval and automated rule-based logic.

CineMatch AI [↗](#)

12/2025

Movie Recommendation System

[Live Link](#) [↗](#)

[Source Code](#) [↗](#)

Tech Stack: Next.js, TypeScript, Tailwind CSS, Framer Motion, FastAPI (Python), Pinecone, sentence-transformers, TMDB API

- A hybrid movie recommendation system leveraging semantic AI, vector embeddings with Pinecone, and a VOD-style interface, utilizing natural language processing to interpret user intent beyond keyword matching.

MoonMafia [↗](#)

03/2026

A High Stakes Betting Game

[Live Link](#) [↗](#)

[Source Code](#) [↗](#)

Tech Stack: Python (FastAPI), React, SQLAlchemy (ORM), JWT (Auth), Tailwind CSS, Framer Motion

- A high-stakes betting game featuring a custom economic engine, secure persistent identity management, and real-time integration with external vision APIs to resolve game outcomes.

Moodrae AI [↗](#)

03/2026

A Chat Pattern Analyzer Platform

[Live Link](#) [↗](#)

[Source Code](#) [↗](#)

Tech Stack: Python (FastAPI), Next.js, Transformers, Sentence-Transformers (Embeddings), spaCy (NER), Pandas, Scikit-learn, Recharts

- A privacy-first analytics engine using local NLP models to intelligently parse, cluster, and visualize WhatsApp chat logs for sentiment trends, topic shifts, and speaker profiling

QuranIntelligence [↗](#)

04/2026

A Quran Verse Search Platform

[Source Code](#) [↗](#)

Tech Stack: Python, FastAPI, sentence-transformers (BGE-M3 Embeddings), FAISS (Vector Indexing), React, SQLite, Pandas

- An AI-powered semantic search engine designed to intelligently retrieve, analyze, and relate Quranic verses using multi-lingual embeddings and high-performance vector similarity matching.

UNiBUD.LK [↗](#)

05/2025

Student Accommodation System

[Live Link](#) [↗](#)

Tech Stack: React, Typescript, Express, Node.js, MongoDB, Firebase

- A service system to bridge the gap between landlords and students for easy accommodation finding.
